

Inside / Outside Research

Task: Use the visual below to help you determine what you already know about a topic and what you need to go out and research.

Instructions:

Use the following questions to help you contextualize your topic. If your answer to the question comes from inside your own brain, jot it down inside the “head”. If your answer comes from an outside source or if you need to do some outside research to find the answer, jot it down in the space outside the “head”.
