RESOURCE COLLECTION

Creating Burnout-Proof Schools

The Capacity Equation

A portable formula and diagnostic lens for school leaders to assess current school conditions so you can move initiatives forward.

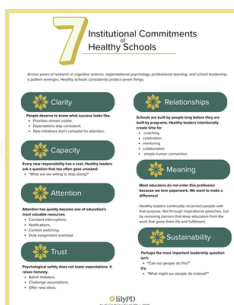

The Decision Pyramid

A framework for sorting mission-level choices from routine ones so leadership attention stops flowing to whichever problem is loudest instead of whichever matters most.

Extraneous Load Map

A seven-part diagnostic for finding exactly where capacity is leaking before it turns into burnout. If you've ever watched a great PD day get buried by the school year that followed, this names why so you can work to improve it.

7 Institutional Commitments of Healthy Schools

Seven research-backed hallmarks of healthy schools. Used as a checklist, it lets a leader diagnose which specific condition might be undermining their PD investment and implement conditions that help the school thrive.

By Dr. Derek Porter

Dr. Derek Porter is an educator, researcher, and writer who explores how organizational conditions shape the experience and performance of the people within them. He currently serves as Assistant Head of Middle School at Greenhill School in Dallas, Texas, and has more than 15 years of experience in independent schools.
